

## **Students Satisfaction Survey and Report**

As part of student satisfaction survey, the institution takes feedback from students to acquire knowledge of their satisfactory levels. Students are asked to assess performance of the institution in various aspects including academic, library, administration, career counseling, campus environment, and co-curricular activities. In the satisfaction survey, responses from students are taken from students in respect of syllabus and classroom teaching. Students are also asked about the profits that they would generally be able to reap from different career counseling activities initiated by the Career Counseling & Guidance Cell and the IQAC. Responses are also sought from the students regarding ICT Classrooms and audio-visual aids in teaching available in the institution. Apart from these, feedback is taken from students about the space provided in library as well as efficacy of the books and references provided there. Moreover, in the feedback mechanism students are also asked to rate the services being provided by the office staff at present. After taking all the responses, the institution assesses the overall performance and executes the required measures, if needed.
